Ans: to the q. no: 1

"Agile model is better than waterfall model
Yes I, am agree with this statement.

Agile model is better because, the heigh
priority of this model is satisfy the.
customer. Agile model supports face-to-face
communications with customers. Agile model
support anytime changes and provide
frequent delivery to client.

So, I think agile model is better than
waterfall model.

Project scheduling time frame:

Planning

Req analysis

Testing

2-3 months.

Designing

Building

We can see there time project scheduling time frame of agile model is flexible.

Real-life example of Prototyping model is e-commerce website. A site like evally.

We know, we used prototyping model when the requirements of the products are not clarly understood.

We know, Prototyping model can be succesfully used for, devoloping user interfaces, high technology software-intensive system.

In e-commerce site we need all of things. So it is very good choice for prototyping model.

Customer feedback → is used to → Develop prototype

results into

used for

Testing of Prototype by The customer

Prototyping model.
